

PIR Motion Sensor Infrared Anti-Theft Alert System Remote Sounder

The Wolf ICON PIR Remote Sounder is paired with the ICON PIR alarm and indicates a direct sound signal and the LED flashes if a stranger or an animal should approach unnoticed day or night.

Inserting Batteries

To insert batteries use screwdriver provided and open 2 screws on battery compartment. When inserting new batteries always replace all of them. When PIR Sounder is not going to be used for a while it is recommended to remove batteries in case of leakage.

Power On

When the PIR Sounder is turned off, Press Power Button and hold for 4 seconds.

Power Off

From any mode press and hold Power Button for 3 seconds. Release Power Button.

Battery Level Indication

Good battery level shows green, yellow and red, OK battery level shows yellow and red and bad battery level shows just red.

Vibration Mode

Press the volume up or down buttons and then press the Power Button to toggle vibration ON/OFF.

Red status LED - Vibration OFF

Green status LED - Vibration ON.

Press OK to confirm the change in settings.

Volume Adjust

From idle, or an alert display, pressing UP or Down Arrow Button will enter volume adjustment. UP or Down Arrow Buttons will then adjust the volume of the PIR Sounder.

Channel Select

From idle, Press OK to enter channel browsing mode. The last channel to receive an alert will be selected by default, and its corresponding channel LED will pulse in the selected alert colour. If the channel is unpaired, the channel LED will fast blink red. The up and down Arrow keys are used to navigate between the different channels.

The Device Option LED will illuminate if applicable for this device. The LED will illuminate red to indicate that the Device Option Toggle is off, or green to indicate the toggle is on. See 'Device Option Toggle' for more info.

Factory Default

To return the PIR Sounder to factory settings, and clear all user data, power the PIR Sounder off, and then power it back on while holding the Mute button. When all the channel LED's turn Blue, release only the Mute button while keeping Power Button pressed. After the Blue LED's have flashed and turned Off, the PIR Sounder can be turned back on by holding the Pwer Button.

Device Pairing

From idle, Press OK to enter channel browsing mode. Use up and down buttons to select an unpaired channel, indicated by a fast blinking red indicator. Press and hold Mute key to initiate pairing. Initiate the pairing sequence on the other device. On successful pairing, the PIR Sounder will return to the channel select mode and play a tone.

Device Unpairing

From idle, Press OK to enter channel browsing mode. Use up and down buttons to select a paired channel, indicated by a pulsing indicator LED. Press and hold Mute button until indicator turns BLUE. Release then indicator will blink RED. Press OK to confirm, or wait for the mode to time-out if you wish to cancel. After deletion, the PIR Sounder will return to the channel select mode, indicating the unpaired channel with a fast flashing red indicator.

Global Mute

A press of Mute button will start the global mute sequence, and a quick double press will start the global unmute sequence. Colour is used to differentiate between mute and unmute. White representing a mute operation, and green an unmute. All paired devices will be muted/unmuted. The corresponding channel LED will flash white/green while the communication is in progress.

When communication was successful, the channel LED's will turn to a solid white/green to indicate the channel has been muted/unmuted. If some paired devices are unreachable, they may not successfully mute. If this happens, the corresponding channel LED will alternate between white/green and red.

Device Option Toggle

From idle, Press OK to enter channel browsing mode, double press the Power button to toggle the paired device's 'Device Option'. The effect of this toggle depends on what type of device is paired to that channel. Below is a generalisation of products and the associated effect.

Bite Alarms: Toggle IQ Port On/Off
Light Devices: Toggle the main light On/Off
Motion Sensors: Toggle the device between Standby and Active

When communicating, the Channel LED and the Device Option LED flash to indicate the channel selected, and the state that is sending. When communication is completed, the PIR will go back to channel select mode, and indicate the new state of the Device Option Toggle with a green or red colour.

Channel Info

From idle, Press OK to enter channel browsing mode, press and hold the OK button to display info about the connected device. The PIR Sounder will cycle between display of the RF signal strength, and the connected device's battery level until the OK button is released.

Alerts
